

PRESS RELEASE

FrontierZero Nominated for Rising Star in Cyber Defence 2025 at CSC Awards

Dubai, UAE — 16th June 2025

FrontierZero, the GCC's only dedicated SaaS Security Posture Management (SSPM) platform, is proud to announce its nomination for the prestigious *Rising Star in Cyber Defence 2025* award at the UAE Cyber Security Council's annual CSC Awards.

Founded and built in the UAE, FrontierZero is rethinking how modern security teams secure SaaS environments—bringing visibility, context, and control to sprawling identities, integrations, and Shadow IT. The nomination recognizes our unique identity-first approach to SaaS risk, and the impact it's already having across organizations in the UAE, KSA, and the UK.

“To be nominated by the UAE's Cyber Security Council, alongside leaders in the region, is a major moment for our team and the security challenges we're tackling.”

– Mohamed Morsy, Co-Founder at FrontierZero

The *Rising Star* nomination highlights innovation and progress in the cybersecurity startup ecosystem. It celebrates new players who are not only building from the region, but also setting global benchmarks.

We're grateful to our early customers, partners, and investors—this nomination is a reflection of their trust and momentum.

About FrontierZero

FrontierZero gives modern security teams the visibility they need to secure SaaS tools at scale. From identity mapping to Shadow AI detection, we help organizations monitor risk across hundreds of apps in real time.
