

## PRESS RELEASE

### **FrontierZero Partners with Outbreach to Help High-Growth UK Companies Tame SaaS Sprawl**

*Dubai, UAE — June 12th, 2025*

FrontierZero, the SaaS security platform helping companies secure their SaaS and AI environments, has announced a new partnership with Outbreach, a UK-based cybersecurity and IT partner specializing in scalable, hands-on solutions for high-growth businesses.

This collaboration brings FrontierZero's continuous SaaS visibility, identity management, and misconfiguration detection to Outbreach's clients—many of whom are navigating complex tool stacks, fast-scaling teams, and growing compliance pressure. Together, the two companies will launch joint go-to-market efforts, provide early access to integrations, and offer tailored support for growth-stage companies in fintech, SaaS, and beyond.

*"We're seeing growing interest across the UK as organizations search for real-time control over their SaaS and AI stack," said Karl McGowan, Co-founder of FrontierZero. "Outbreach's practical, founder-first approach and deep understanding of the fast-moving startup ecosystem make them an ideal partner to help deliver on that need."*

#### **About Outbreach**

Outbreach are specialists in rapid cyber incident response, trusted by businesses when it matters most. As your cyber emergency service, they act fast to investigate, contain and eradicate cyber threats - minimising reputational damage, financial impact and operational downtime when every second counts.

Outbreach's service extends beyond the initial attack to address the whole crisis facing your company. Their team includes lawyers, insurers, publicists, negotiators, investigators, as well as cyber security and technology experts - providing an all-in-one emergency response team ready to tackle any crisis head-on.

*"Our clients are smart, fast, and focused - but when a cyber incident hits, they need more than just technical expertise. FrontierZero's continuous SaaS visibility helps us spot potential issues before they become full-blown crises, giving our clients the early warning they need to stay secure without slowing down." - Dom Aslan, CEO, Outbreach*

Outbreach doesn't just fix the problem - they help businesses recover and rebuild. Their crisis response approach is built on clear, decisive action: no panic, no judgement, just fast expert response. Whether responding to an active breach, building incident

response plans, or conducting tabletop exercises, Outbreach protects businesses when it matters most, seeing them through to the end with every angle covered.

With 24/7 emergency response capabilities and offices in London, New York, and Dubai, Outbreach exists to stop business failure caused by cyberattacks. Because cyber resilience isn't just about preparation - it's about how fast you recover and how you rebuild.

### **Why FrontierZero?**

As organizations expand their use of SaaS and AI tools, the complexity of managing access, identities, and integrations grows exponentially. Every new app, account, and connection increases the chances of something slipping through the cracks—whether it's a forgotten admin login, a bot with excessive permissions, or an unapproved AI tool connecting to sensitive data.

FrontierZero was built to solve that problem.

FrontierZero gives organizations complete visibility into every identity, app, and integration across their SaaS environment. Unlike traditional security tools, which rely on snapshots or static rules, FrontierZero continuously monitors for real-time changes, so when something breaks, drifts, or looks suspicious, it's caught fast.

With FrontierZero, organizations gain:

- **Clear visibility** into every identity, app, and connection
- **Smart alerts** that highlight real risk—like missing MFA or excessive access
- **Simpler audits and stronger compliance** across SOC 2, ISO 27001, and more

Whether you're trying to meet regulatory expectations, prevent lateral movement, or finally get control of your SaaS sprawl—FrontierZero delivers clarity when it matters most.
