

PRESS RELEASE

FrontierZero Wins “Rising Star in Cyber Defence 2025” in <startups/> section at UAE CSC Awards

Dubai, UAE — 19th June 2025

FrontierZero has been named *Rising Star in Cyber Defence 2025* in startups section at the Cyber Security Council Awards, hosted by the UAE’s national cybersecurity authority. The win marks a major milestone for the company and the growing regional focus on SaaS-native security.

Born and built in the UAE, FrontierZero is the region’s only SSPM provider—and this recognition underscores the critical need for visibility and control in the SaaS layer, where traditional tools fall short.

“We built FrontierZero because security teams were flying blind. This award validates that vision—and energizes us to keep building.”

– Karl McGowan, Co-Founder at FrontierZero

The CSC Awards spotlight innovation across public and private cybersecurity initiatives. FrontierZero was honored in the *Startups* category for advancing identity-first risk management and helping organizations uncover threats hiding in cloud apps, AI tools, and unmanaged integrations.

For customers, this is proof that real-time SaaS visibility is no longer optional—it’s the path forward. For partners and investors, it’s a signal that the GCC is stepping into a leadership role in cyber innovation.

What’s next?

We’re doubling down across the UAE, KSA, and UK. More partnerships. More integrations. More resilience for companies navigating the SaaS frontier.

About FrontierZero

FrontierZero helps modern security teams secure SaaS environments at scale—detecting hidden risks in apps like Google Drive, Slack, Notion, Miro, and beyond. Built in the UAE. Trusted globally.
